INTRODUCTION

This edition of the New York Mercantile Exchange Statistical Yearbook contains data on trading activity for the period August 1978 through August 1979.

During the course of the year, the Exchange's contracts for Platinum, Palladium and Imported Lean Beef each posted record volume. The introduction of U.S. Delivery Petroleum Products Futures has been well received and trading in Heating Oil has grown steadily since the market opened in November 1978. Overall trading volume increased relative to year-earlier levels. A breakdown of trading by market shows Platinum and Round White Potatoes as the most active contracts as follows:

Platinum Futures	541,585
Maine Round White Potatoe Futures	334,056
Palladium Futures	47,543
Imported Lean Beef Futures	14,076
International Currency Futures	7,884
No. 2 Heating Oil Futures	7,786
U.S. Silver Coin Futures	7,739
Gold (400 Ounce) Futures	1,550
Gold (Kilo) Futures	446
No. 6 Industrial Fuel Oil Futures	61

Total Contracts Traded	962,726
------------------------	---------

In order to promote the efficiency of the markets, the Exchange revised its rules relating to the limits on maximum daily price fluctuations. A new spread rule, which will permit a better correlation to the real market value, was also submitted to the Commodity Futures Trading Commission (CFTC) for approval. The Exchange is presently awaiting Commission approval of amendments to its Round White Potato, Imported Lean Beef and Platinum contracts. The proposed revisions, when implemented, should greatly enhance trading of these contracts.

The Exchange has also submitted two additional petroleum products contracts to the CFTC, including Gulf Coast delivery heating oil and New York delivery gasoline (leaded and unleaded). These contracts will complement the New York delivery heating oil contract presently traded.

The Exchange's trading report service, which provides hourly updates on the latest prices, volume and open interest, has been expanded to accommodate all of the commodities traded. The telephone numbers are listed on Page 7.
